# Enviro Spāse®

Display and Analysis of Site Environmental Data

Features:

- **Easily map your data**
- **Customize your displays**
- **Display supporting data**
- **Create sophisticated graphics**
- **Highlight important information**
- **Use with Enviro Data or any database**

Benefits:

- **Inexpensive to buy**
- **Save time and money**
- **Improve project quality**
- **Easy to learn and use**
- **Impress your clients**
- **Best support in the industry**
- **Try it for free!**

Your situation …

A lot of time and money goes into gathering data for your projects. Make the most of your data by incorporating its spatial component into effective GIS displays and analysis.

Our solution …

With Enviro Spase (pronounced like "space") you can create attractive, informative GIS displays of your data with a minimum outlay of time, and the maximum accuracy.

Going beyond the data …

We bring you the expertise and support to create a single-user or company-wide integrated database and GIS system that is central to all your site data workflow applications - from the lab to the regulators.

Enviro Spase can help you:

- **Reduce expenses**
- **Increase revenue**
- **Gain competitive advantage**

**Let Geotech show you how!**

Direct Connection - Easily display your **Enviro Data** and other database information in ArcGIS with no additional software required.

Highlight Exceedences

Value and Flag Display

**Non-Detect**

0.13
0.08 BJ
< 0.06
0.1
0.096

For example, use **Enviro Data**'s Value and Flag feature to highlight non-detect exceedences and other useful information. Use the power of **ArcGIS** to present and analyze your data for maximum impact.
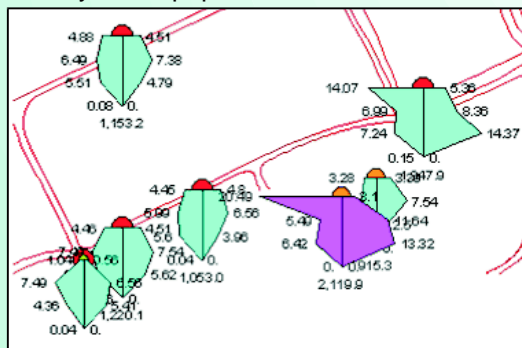

Display Wizards - Create sophisticated displays with the easy-to-use **Enviro Spāse** wizards.
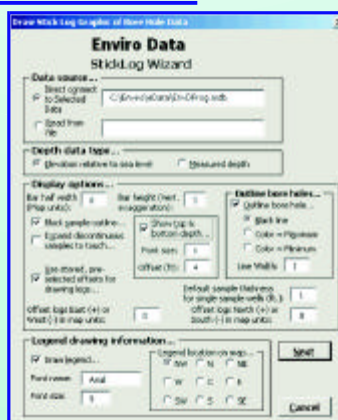

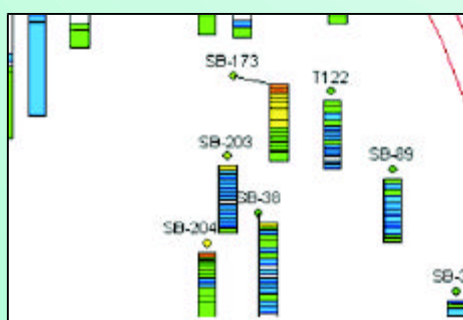

Callout - Display data tables on the map next to each station, with lines by date, depth, or constituent. Color code by exceedence or parameter.

Stiff - Draw Stiff water quality diagrams showing major ion concentrations for each station, to identify water populations.

Stick Log - Create stick logs for each location showing constituent concentration by depth to better understand contamination distribution.

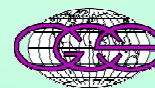

Enviro Spāse Features

Direct Connection
Use standard Enviro Data and ArcGIS features
Easily select just the data you want
Put data from Enviro Data on your current maps
Complete flexibility in how you display it
Use Value and Flag feature for map labels
Map data changes with Enviro Data selections
Easily graph your data in ArcMap.

Callout Wizard
Create information-rich callouts automatically
Select fields for the header and detail lines
Color-code exceedences
Color-code by parameter
Display Value or Value and Flag
Software automatically places the callouts
You can drag the callouts to fine-tune placement
Numerous sorting and display options
Connect to Enviro Data or draw from a file

Stiff Diagram Wizard
Automatically draw polygons at well locations
Calculate millequivalent values by parameter
Calculate and display TDS
Color-code based on user-selected TDS cutoff
Charge balance cutoff to suppress display
Draw a legend
User-controlled X and Y scaling
Connect to Enviro Data or draw from a file

StickLog Wizard
Color-code based on concentration
Optionally draw top and bottom depths
Draw using elevation or depth
Draw a legend
User-controlled X and Y scaling
Use XY offsets for borings for better spacing

Enviro Spāse Prices

Single User License	$1,000
Concurrent Use License	Call

30 day money back guarantee. Annual maintenance (support and upgrades) can be obtained for 20% of the list price per year. Quantity and educational discounts are available. Call for information.
